

CYBER RUBBISH

zine 1.

Cyber Rubbish is
a eMagazine
showcasing the
art of DataMosh
as well as other
cyber-age related
media.

At First
glance these
pictures may
seem as
mistakes or
unfinished.
But they are
just that,
there are a
type of media/
art that is
not about the
clean and
mastered look.
Rather the
corrupted and
accidental.

The Cyber Art Manifesto

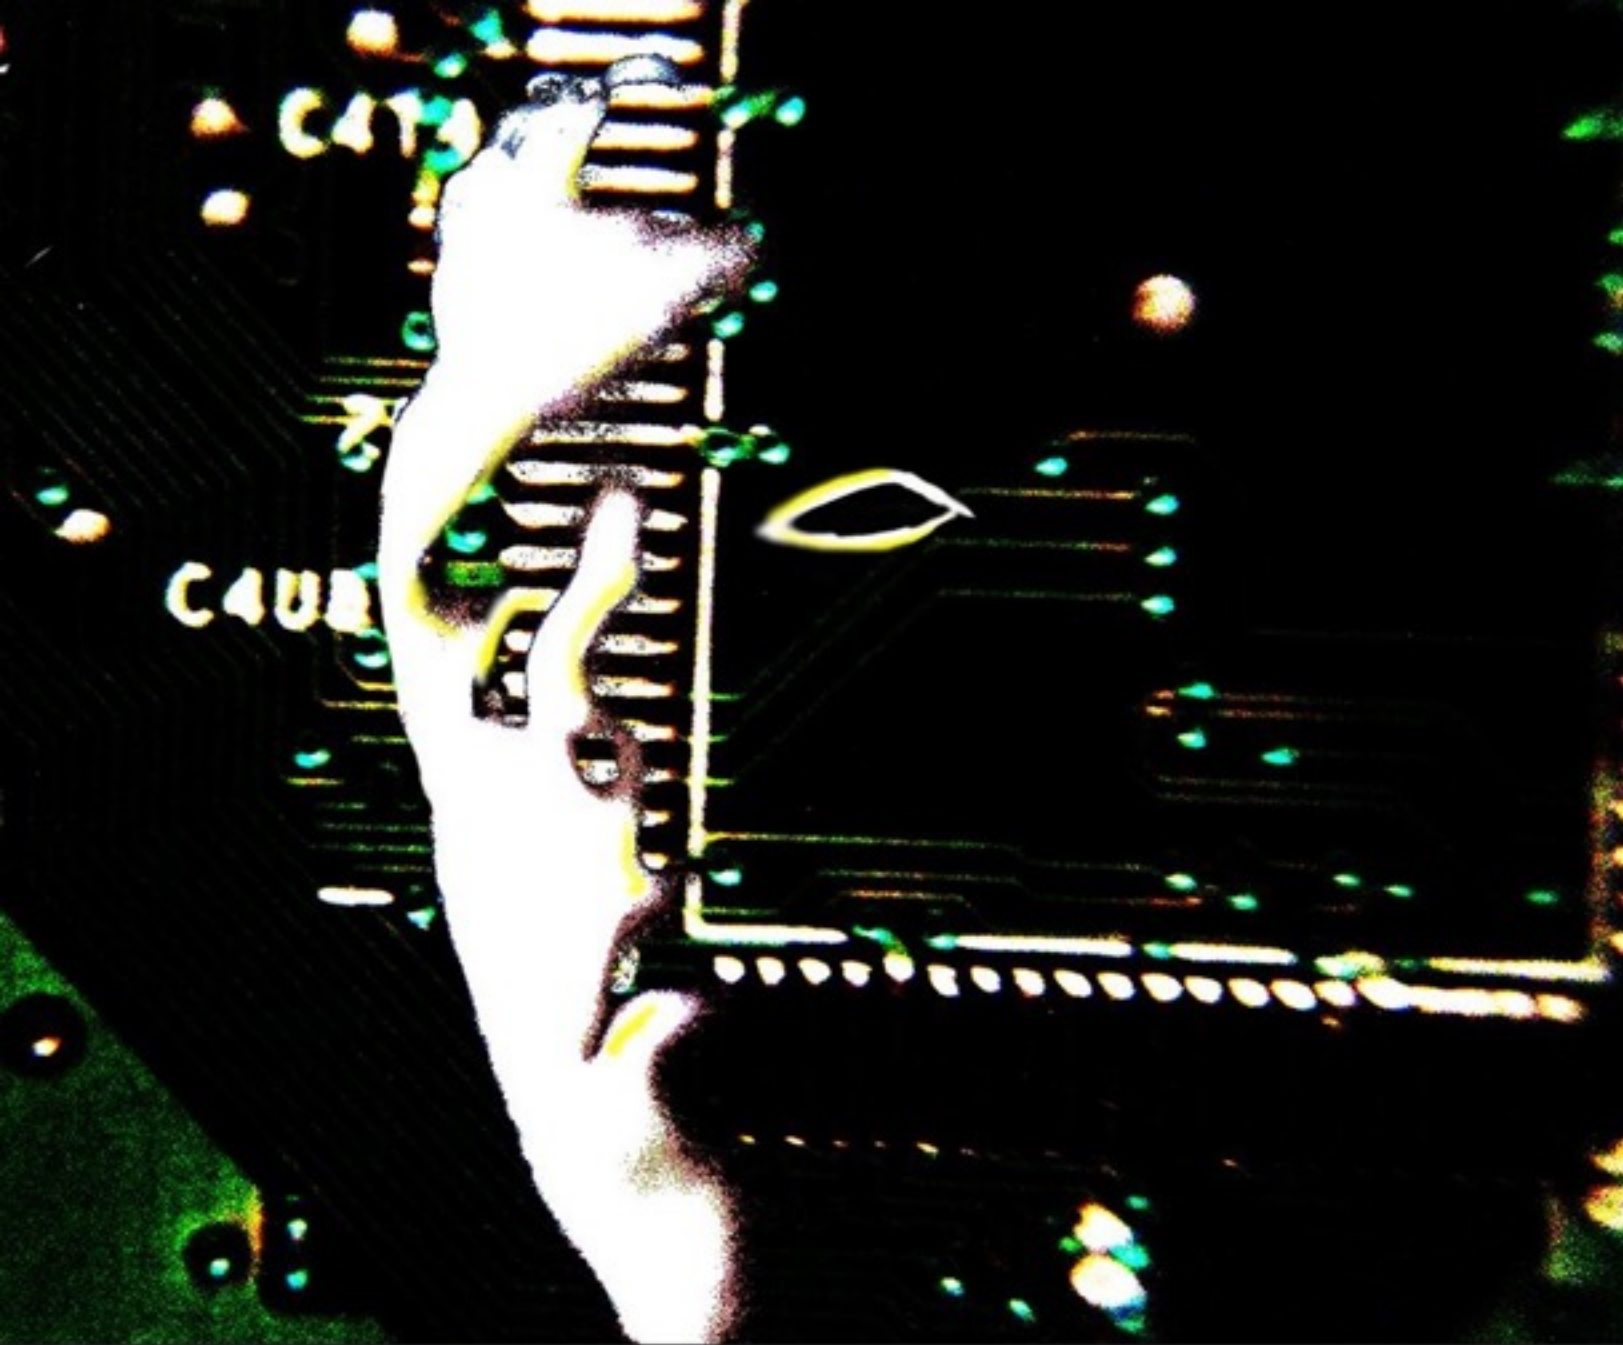

The Cyber World, people sitting in front of computer screens, doing what comes naturally. That is “creating.” Creative energy is the most powerful energy in the universe.

As most of the world stares at screens creating content for those they will never see in there life. Meeting people they would never meet otherwise.

This I why I have done some research into the world of aesthetic and composition. Blending beauty and the cyber-age together, not to mention themes such as accidents, data corruption along with naturalistic/fractal designs.
